

PROCESS ENGINEER

Respect * Customer Driven * Innovation * Global Perspective * Action Oriented

This job requires relocation to the Greater Louisville, KY area. Relocation assistance will be provided.

Flex Films has various opportunities relating to Process Engineering roles which require different levels of experience. Please do not hesitate to apply today if you have experience with the following:

- **Technical background; chemical science, coatings, or engineering bias**
- **Analytical abilities**
- **Results driven with "ownership" mentality**

The Process Engineer is responsible for evaluating existing processes and configuring manufacturing systems to reduce cost, improve sustainability, and develop best practices within polyester film production process.

Additional Responsibilities may include but are not limited to:

- Maintain reliable and safe manufacturing systems while improving production rates, efficiencies, yields, costs, and changeovers.
- Evaluate and improve on processes in manufacturing systems, issues with production line, and troubleshoot when production issues occur.
- Ensure continuous running of mainline and offline operations; metallizer, slitting, and packaging machines.
- Develop innovative solutions, conduct trials, and continuous improvement processes.
- Improve process capability and production volume while maintaining and improving quality standards.
- Provide process documentation and operating instructions.
- Provide technical support to internal and external customers.

Requirements

- Bachelor's degree in technical disciplines; Chemical engineering, Polymers, or Chemistry related studies preferred
- 3 to 7 years in production environment; flexible packaging, plastic extrusion, coatings or chemicals industries preferred
